Zoho Creator Manual 2012

The first database created by previous AFWG staff was not searchable and therefore not the right fit for the AFWG website. In order to create a searchable database, the AFWG GSR had to create an external database that would be embedded into the AFWG website. The database was created on Zoho creator and is easy to use and accessible. To access the database template and to edit it go to:

1. Open your web browser
2. Go to https://www.zoho.com/creator/, click on Sign in the top right corner.
3. **Username:**
   Password:

1. Click on AFWG Scholars Database. On the left side of the page you will see a box that says, "Home", from this box you can click on either link to see the actual database or the entry form.
2. To edit the entry form, click on "edit this application" on the top of the page. You can then add or delete entry boxes by using the basic fields section on the left.
3. To edit entries go the database view and click edit next to name of the scholar's entry you would like to edit.

The application used by AFWG within Zoho creator is called: AFWG Scholars Database. The link to this application can be found here.
http://creator.zoho.com/thearabfamiliesworkinggroup/afwg-database

In order to make sure that the application embedded in the website always works, the application must be marked as public.

Forms:

Within this application AFWG uses 2 forms: the input form and the search form. The input form is where the scholar adds their name to the scholars' database. The search form is the form that lets visitors to the AFWG website search the scholars' database.

Input Form:

- In the top menu bar, click on the "Script" tab

- In the bottom left hand corner of the screen, under form definition, click "With action"

- And then you will find the code, which is editable within this screen. The HTML code for this input form is below:

- To add or delete degree disciplines, countries, or keywords: go on the left Drop Down arrow, Edit this Field: Click + to add new choice; Click - to delete a choice. Press Done when finished.

```

      )

   }

 }
```

}

Another way of creating the input form without HTML code is to:

- Go to "Forms" dropdown menu and click on "Input Form"

- On the left side of the screen are basic fields, which are dragable.

- To create a new input field box, drag the field box you would to add into the form in the location where you would like to add it.

<u>Search Form</u>:

- Go to the forms dropdown menu and click search form

- In the top menu bar, click on the "Script" tab

- In the bottom left hand corner of the screen, under form definition, click "With action"

- And then you will find the code, which is editable within this screen. The HTML code for the search form is below:

- <u>To add or delete countries or keywords</u>: go on the left Drop Down arrow, Edit this Field: Click + to add new choice; Click - to delete a choice. Press Done when finished.

```
form  Search_Form
{
    displayname  =  "Search Form"
    store data in zc = false
    success message  =  "Searching..."
    field alignment = left

    last_name

}

openUrl(searchUrl, "Same window");

}
```

Another of way of creating the search form without HTML code is to:

- Go to forms dropdown menu and click on input form

- On the left side of the screen are basic fields, which are dragable.

- To create a new input field box, drag the field box you would to add into the form in the location where you would like to add it.

Views:

Within this application, AFWG uses 3 views: the database view, person view and search view.

- Database view: The database view display scholars and their information in a list, collected from the input form.

- The person view: displays how each scholar and their information will be viewed in the search results

- The search view: Creates the actual search results from the search form query.

Database View:

- This view is created automatically when you create the input form.

- From the menu bar select the dropdown menu for "Views"

- Click on "Database View"

- In the dropdown menu "More Actions"

- Click on "View Definition", this will show you the HTML code for the database view, which can be found below.

```
list  Database_View

To embed application into AFWG Website:

- From the Homepage, click on "AFWG Scholars Database"

- Click on the dropdown menu "More Actions"

- Select "Embed in your website"

- Copy IFrame Snippet and paste into HTML section of drupal editing page

Currently, it is on the AFWG Drupal homepage under the Scholars' Database Block

1) Log in to AFWG home page on Drupal, http://www.arabfamilies.org/

2) Under Scholars' Database, click on Configure Block at the top left symbol.

3) Change to HTML view

4) paste the IFrame Snippet code here

Note: Please contact Zoho Creator Support (support@zohocreator.com) if you ever run into trouble with the search form, input form, and/or search view. They respond within a few days. Be patient.

To give Zoho Creator Supprt control of your account so that they can change a part of the database or a code script, Please visit the following link and enable edit access to support so that they can check on this here. https://creator.zoho.com/thearabfamiliesworkinggroup/afwg-database/settings/edit

(On the top right: To debug an issue reported, the support team may sometimes request you to share your application with edit access. Click below to share your application to them with edit access. Click "Allow edit access to support."

When Zoho Creator Support is done editing the script or doing what you want them to do, come back to this page and click on "Cancel edit access to support" for personal and security purposes. Thank you.
